SES NationState 2005Q3

To follow is a review of SES' latest national random telephone survey of 1,000 Canadians completed between August 4th and August 8th, 2005. The survey is accurate to within 3.1 percentage points, plus or minus, 19 times out of 20. The margin of accuracy will be wider for sub samples. Percentages may exceed 100 due to rounding.

The research was registered with the Marketing Research and Intelligence Association of which SES is a member.
