Ontario's Nuclear Future

SES/Osprey Media Poll

Methodology

Between September 15th and 19th, 2005, SES Research conducted a random telephone survey of 504 Ontarians 18 years and older.

The aggregate survey results are accurate $\pm 4.4\%$, 19 times out of 20. Margins of accuracy are wider for subgroup samples. Readers should note that the data was weighted for gender and age to match the 2001 Canadian census results. Results should be considered representative of the Ontario population. Results may not add up to 100% due to rounding.

The initiative was part of the SES Ontario Omnibus Survey and was registered with the Marketing Research and Intelligence Association of which SES is a member.

About SES

Established in 1987, SES Canada Research Inc. is a full service public opinion research and management consulting firm. SES is regularly called upon by corporate, government and para-public clients in Canada and the United States to conduct research and provide strategic advice.

For more information on our full range of services please our contact: Mr. Nikita Nanos at (613)234-4666 or nnanos@sesresearch.com.

Question: Thinking of Ontario's future energy needs, do you believe that the province of Ontario should be using nuclear power more, less or at its current level?

	More	Current level	Less	Unsure
Group (Margin of Accuracy)	%	%	%	%
Ontario ($\pm 4.4\%$)	41	27	23	9
Men ($\pm 6.4\%$)	52	23	19	6
Women ($\pm 6.2\%$)	30	32	26	12
18 to 29 ($\pm 10.0\%$)	37	27	27	10
30 to 39 ($\pm 9.7\%$)	41	36	15	8
40 to 49 ($\pm 9.7\%$)	35	31	26	9
50 to 59 ($\pm 11.2\%$)	51	20	27	3
60 and over ($\pm 9.4\%$)	42	21	20	15
