## SES/Sun Media Survey

To follow is a review of SES' latest national random telephone survey of Canadians 18 years of age and older completed between July 28th and August 4th, 2007. The statistics of committed voters for the current wave is accurate to within 3.3 percentage points, plus or minus, 19 times out of 20 . The margin of accuracy will be wider for sub samples. Percentages may exceed 100 due to rounding.

The research was registered with the Marketing Research and Intelligence Association of which SES is a Gold Seal Corporate member.

For those parties you would consider voting for federally, could you please rank your
top two current local preferences? (Committed Voters Only - First Preference)

## SES/Sun Media Best PM Poll

## Methodology

Between July $28^{\text {th }}$ and August $4^{\text {th }}, 2007$, SES Research conducted a random telephone survey of 1,001 Canadians 18 years and older. The aggregate survey results are accurate $\pm 3.1 \%, 19$ times out of 20 . Margins of accuracy are wider for subgroup samples. Readers should note that the data was weighted for age to match the latest Canadian census results. Results should be considered representative of the Canadian population. Results may not add up to $100 \%$ due to rounding.

Results are compared to the NationState survey of 1,000 Canadians conducted between April $26^{\text {th }}$ and May $1^{\text {st }}, 2007$. Results for this wave of research are accurate $\pm 3.1 \%, 19$ times out of 20 . Margins of accuracy are wider for subgroup samples. Readers should note that the data was weighted for age to match the latest Canadian census results. Results should be considered representative of the Canadian population. Results may not add up to $100 \%$ due to rounding

The initiative was registered with the Marketing Research and Intelligence Association of which SES is a Gold Seal Corporate member.
