Coal Power Plants in Ontario

SES/Osprey Media Poll

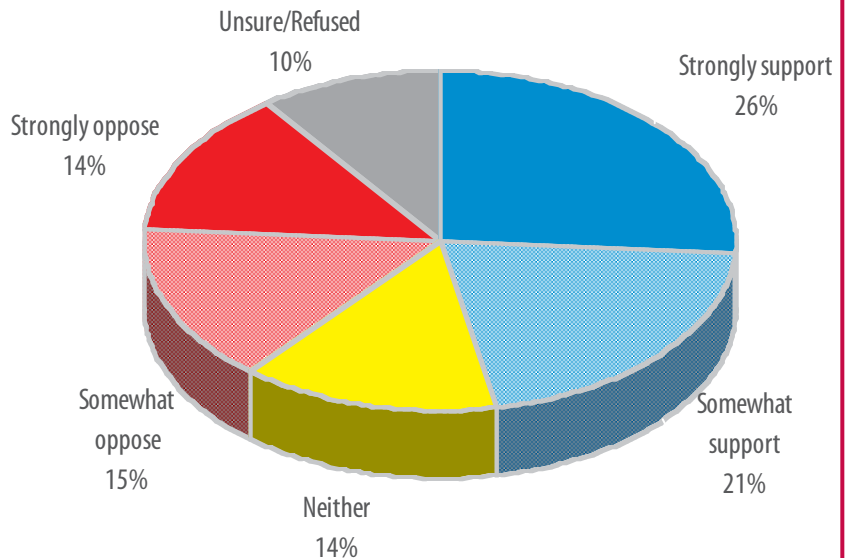

Methodology

Between January 30th and February 3rd, 2006, SES Research conducted a random telephone survey of 500 Ontarians 18 years and older.

The aggregate survey results are accurate $\pm 4.5\%$, 19 times out of 20. Margins of accuracy are wider for subgroup samples. Readers should note that the data was weighted for gender and age to match the 2001 Canadian census results for Ontario. Results should be considered representative of the Ontario population. Results may not add up to 100% due to rounding.

The initiative was part of the monthly SES Ontario Omnibus Survey and was registered with the Marketing Research and Intelligence Association of which SES is a member.

Question: The government of Ontario is in the process of closing down all of Ontario's coal burning power plants. Do you strongly support, somewhat support, neither support nor oppose, somewhat oppose or strongly oppose this decision?
